General Report Comments:

Document No: 1098681
 Identification
 Mineral Type: Natural Beryl
 Variety: Emerald
 Carat Weight: 1.73 cts
 Measurements: 7.14 x 6.64 x 5.66 mm

Validation Date: 14 February 2019
 Color Description: Green
 Shape: Rectangular
 Cutting Style: Emerald Cut

Comments:

Identification

American Gemological Laboratories™
 America's first and most highly respected origin lab.

Founded in 1977,

AGL is an internationally recognized gemstone testing facility, specializing in comprehensive colored stone analyses.

AGL has the distinction of being the first laboratory in the United States to issue Country-of-Origin reports. Our company and its principals have a long tradition of research into the detection of and reporting on gem identification- and-classification, gemstone treatments and provenance determinations.

Our staff is composed of experts in the field of gemstone testing and reporting. Our findings reflect the latest knowledge and analytical techniques to ensure the highest standards are applied on every stone we test.

AGL's testing and reporting methodology provide you with unsurpassed quality and reliability. We are committed to providing the highest level of service and reporting that our clients and the industry have come to expect from the AGL.

Origin

Origin
 Provenance: Colombia

Comments: Based on available geological information, it is the opinion of the Laboratory that the origin of this material would be classified as Colombia.

Enhancement

Enhancement
 Standard: Clarity
 Degree: Minor
 Type: Modern
 Stability Index: Very Good to Good
 Additional: None

Comments: Emeralds are commonly clarity enhanced to reduce the visibility of fissures. Today, modern types of materials used to clarity enhance gemstones include various polymer-type resins, singly or in combination with other types of fillers.
